

It's Flow Time™

Ready for the Next Step of Your Career?

UroMD is assembling an elite team of urologists.

Choose *when and where* you practice!

Whether you are at the beginning of your career, or a seasoned urologist looking to transition out of full-time clinic hours, UroMD offers a flexible, rewarding opportunity to expand your impact with the work-life balance you choose.

Our white-glove service handles the administrative burden, allowing you to focus exclusively on delivering exceptional patient care. With UroMD, you determine your availability, case volume, and income potential!

Why Focus on Men's Urology?

Over 27M men with lower urinary tract symptoms (LUTS) often postpone a visit to the urologist until their quality of life is greatly affected.

Delayed diagnosis and treatment can lead to a decline in bladder and sexual health, while also contributing to lifestyle challenges, anxiety and depression when left untreated.

UroMD is giving millions of men the ease of immediate first-time access to urology care.

UroMD is the Premier Telemed Solution Dedicated to Urology

Created By Urologists

Convenient urology access for all.

UroMD's technology infrastructure was developed specifically for urological consultations, with features that support your workflow. We've eliminated technological barriers to create a frictionless experience for both providers and patients.

Flexible Scheduling – Easy Access

- Choose your hours, availability, and even same-day appointments when it suits your schedule.
- Reduces the barrier for patients' first-time visit with a 15-minute consultation.

National Media Campaign

- Multi-channel effort across TV, Digital, Social, Print and Audio to build awareness and minimize the fear and stigma associated with urinary health issues, while educating and encouraging men to take action.

Supporting the UroMD Urologist

- Malpractice coverage included.
- Multi-state licensing (up to 13 states).

Seamless Compensation

- Automated patient payment handling that promptly submits compensation to you.

EHR Integration

- Simple integration with existing EHR and practice management systems

Easy to Use Technology

- HD video platform works across all devices with no downloads or installations required for you or patients.
